WHERE BUSINESS IS DONE IN 2016

## Graystar's popularity is soaring

GRAYSTAR Trailers has hit the ground running in 2016.

The last few months of 2015 saw a dramatic increase in trailer orders, basically, new trailers could not be built quick enough.

This led to a full order book for the start of the new year. And at this stage this situation is showing no signs of slowing down.

"It is great to see that the Graystar name is being favourably spread around the industry," Graystar Trailers owner David Gray said.

"We are finding that more and more people are recommending Graystar Trailers to their friends and acquaintances."

Graystar's continuous push on research and design is allowing the newest

trailers to be lighter, stronger and more thermally efficient than other manufacturer's products.

These improvements and the quality of the Graystar build is what everyone is talking about.

Ongoing improvements to Graystar Trailer's chassis designs and laminated panel construction also allow longer and more efficient trailers to be built with minimum tare weight increases.

The newest trailers incorporate all of the premium products that Graystar Trailers are renowned for.

Specifications include Graystar's full length chassis, Hi Density Styrofoam Laminated

**COLD GOLD:** Graystar refrigerated trailers are fast becoming a popular choice.

Panels, European door hardware and door seals.

There is no skimping on specifications or quality of materials just to minimise tare weight or cut costs.

Graystar Trailers are designed to work efficiently.

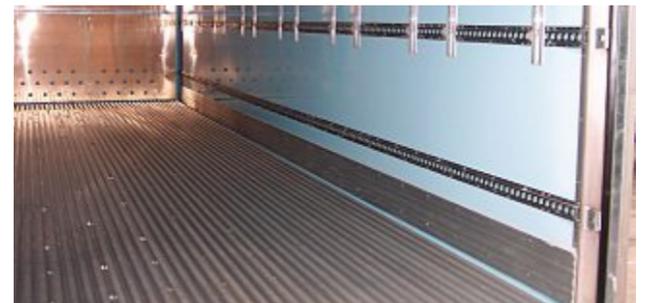

Better chassis design improves tyre wear, brake performance and reduces fuel costs.

Lighter tare weight allows

for more payload, whilst greater thermal efficiency reduces running costs and maintenance on the fridge unit.

All of the features combined in a Graystar Trailer go to prove why buying a premium product in the first place will save money down the track.

For further information, phone (03) 9484 4568.

Graystar Trailers use premium products to build their trailers.
